A set of **768 FREE Noise Textures** for you to use in your games and projects!

Are you looking for some great random noise to do some texture work? Want to experiment with height mapping? Do you just need to make some quick and simple clouds? Then look no further! This pack contains over 250 different types of grayscale noise textures organized into eighteen different categories that can be used however you wish. Every noise texture in this pack has been rendered as *.png and at multiple sizes so you can choose the size that works best for you! Most noise textures are also seamless on both axes. These noise textures are great for creating textures, brushes, visual effects, height mapping and more!

Every noise texture is available in three sizes: 512x512, 256x256, and 128x128

Contents:

- 24 x Perlin Noise Textures (512x512, 256x256, 128x128) - 72 Textures!
- 14 x Cracked Noise Textures (512x512, 256x256, 128x128) - 42 Textures!
- 14 x Gabor Noise Textures (512x512, 256x256, 128x128) - 42 Textures!
- 14 x Crater Noise Textures (512x512, 256x256, 128x128) - 42 Textures!
- 14 x Grainy Noise Textures (512x512, 256x256, 128x128) - 42 Textures!
- 14 x Manifold Noise Textures (512x512, 256x256, 128x128) - 42 Textures!
- 14 x Marble Noise Textures (512x512, 256x256, 128x128) - 42 Textures!
- 14 x Melt Noise Textures (512x512, 256x256, 128x128) - 42 Textures!
- 14 x Milky Noise Textures (512x512, 256x256, 128x128) - 42 Textures!
- 14 x Spokes Noise Textures (512x512, 256x256, 128x128) - 42 Textures!
- 14 x Streak Noise Textures (512x512, 256x256, 128x128) - 42 Textures!
- 14 x Super Noise Textures (512x512, 256x256, 128x128) - 42 Textures!
- 14 x Super Perlin Textures (512x512, 256x256, 128x128) - 42 Textures!
- 14 x Swirl Noise Textures (512x512, 256x256, 128x128) - 42 Textures!
- 14 x Techno Noise Textures (512x512, 256x256, 128x128) - 42 Textures!
- 14 x Turbulence Textures (512x512, 256x256, 128x128) - 42 Textures!
- 14 x Vein Noise Textures (512x512, 256x256, 128x128) - 42 Textures!
- 14 x Voronoi Noise Textures (512x512, 256x256, 128x128) - 24 Textures!

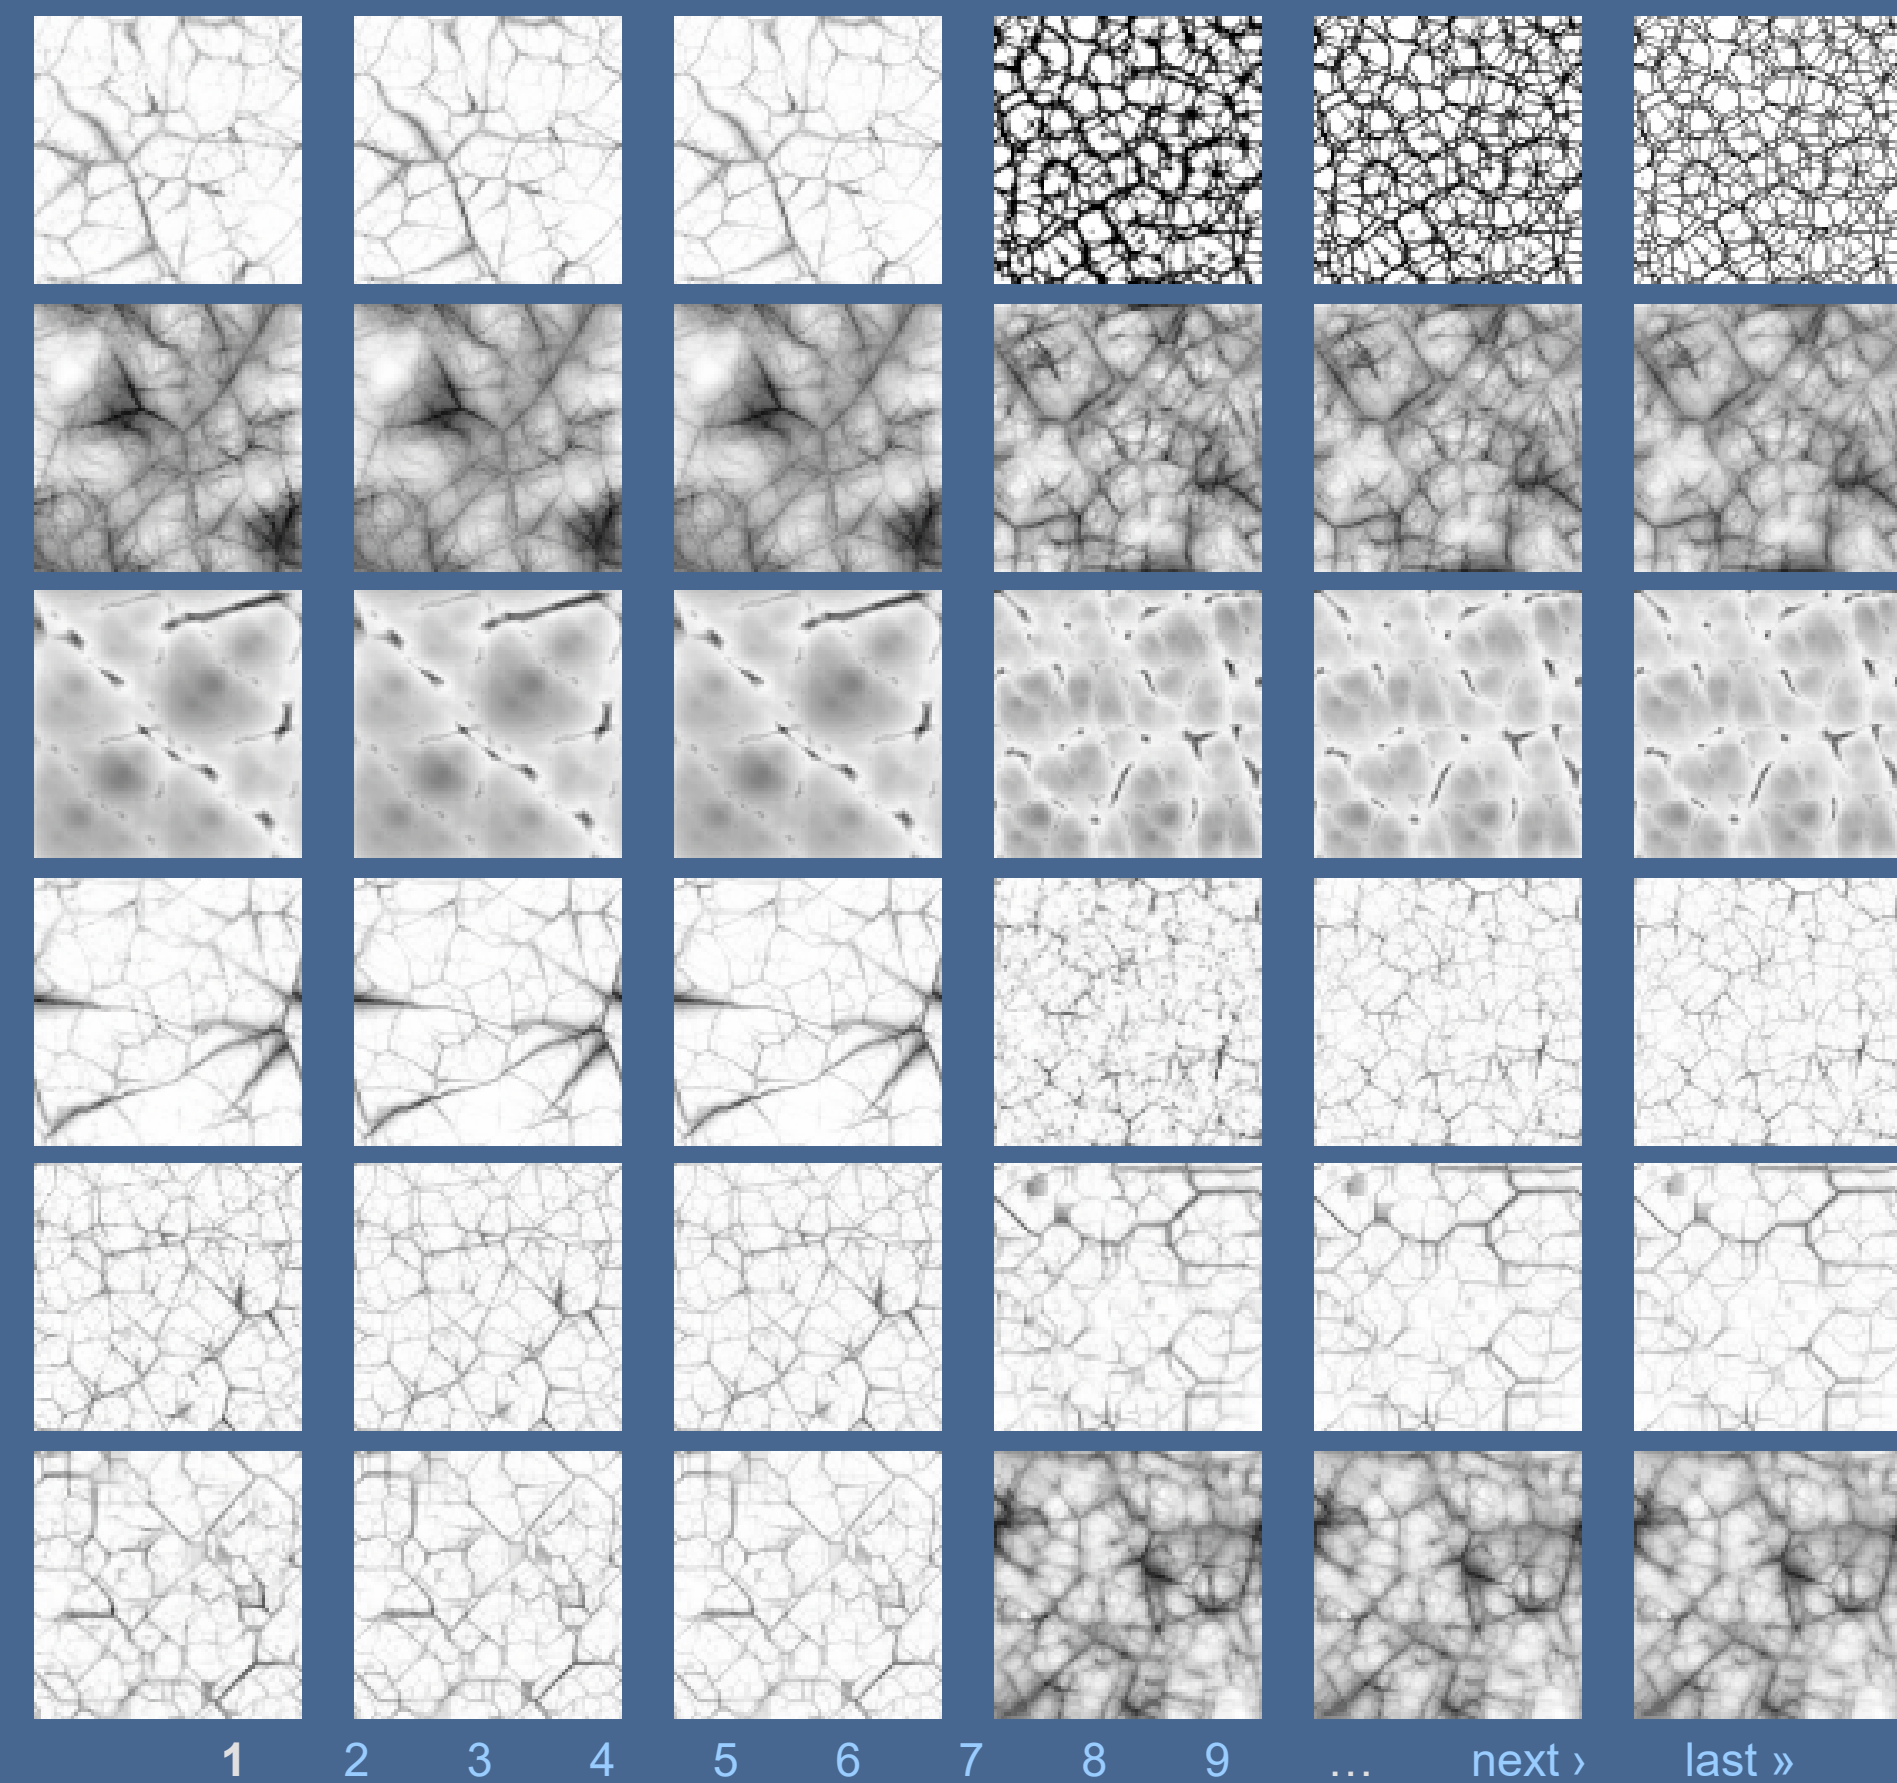

Check out the official Screaming Brain Studios website [HERE](#) to learn some ways you can use the noise textures from this pack!

More noise textures will be added over time!

Whoa, that's a lot of textures! Pretty nice, thank you for sharing this!

What algorithms were used to generate this? Some like Perlin/Voronoi are obvious, but I've never heard of many of the others!

Some are named after popular algorithms, though I named most of the stranger noise textures after the different noise types in each of the tools I used to generate them, so I'm uncertain if all of them are actual noise algorithms outside of those tools :P Though a lot of the textures have been generated using multiple step processes (Starting with a basic Perlin Noise for example, and applying various distortion/rotation/smudging/blurs/remapping/etc. to get the more unique end results) While in other cases, there are some like Techno or Cracks that kind of resemble Cellular Noise or Voronoi but are almost all named as such by the either software I used / or based on their appearance

These are incredible. I've been playing with them as masks in Inkscape, so useful, thank you!
